

COMPLEMENTARY FEED FOR CHICKS DURING TRANSPORT

AgriVite[®]
VITALITY THROUGH NUTRITION

Hydrocubes

Dietetic feed, in form of gel cubes, specially made to attenuate stress reactions of young poultry due to long distance transport (>6h).

Hydrocubes' formula contains 90% H₂O and 10% of nutrients & additives (corn + trace-elements + vitamins + anti-oxidants ...) guaranteeing chicks optimal hydration combined with essential nutrition.

Salmonella free
guaranteed
GMP + Certified

Performance
optimisation

Animal
well-fare

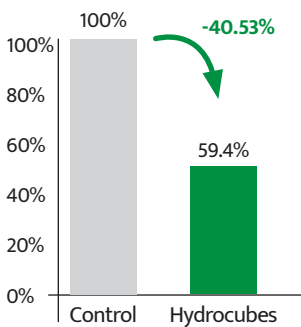

Easy to use and
very palatable

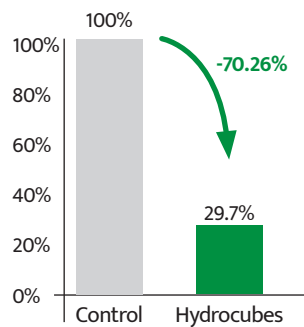

Performances optimisation tested and approved!

A trial was carried out on broiler breeder chicks where chicks were stored for 24hrs at the hatchery. In the shipping boxes, control batch received nothing and test batch received Hydrocubes. At D7, we notice performances optimization of the test batch (Hydrocubes) compared to the control batch.

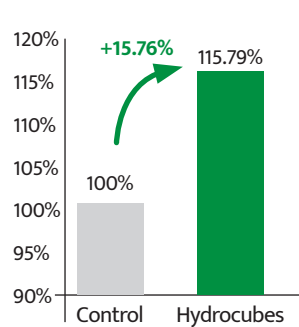

CULL AT D7

MORTALITY AT D7

BATCH UNIFORMITY AT D7

Instructions for use

Administer at the rate of 0.5 - 1g per chick. Place Hydrocubes in transport box / chick crate.

Appearance and Packaging

Green gelified cubes of 25g, conditioned in buckets of 10 Kg (400 cubes).

Shelf life

Store for 6 months at room temperature, away from direct light, in a clean and dry place.

Comparison base: Control's performance value = 100%.
