

Quick and convenient

disinfection with Hydrosan

A high standard of biosecurity is a non-negotiable aspect of modern poultry farming, and thorough disinfection routines are a large part of this. As well as thorough disinfection at the farm gate and during turnaround, there are many other tasks that need to be performed regularly in order to keep disease under control. Having the right cleaning system makes quick work of disinfection routines, ensuring nothing is forgotten or neglected. This is why the Sanigene HydroSan disinfection sprayer is invaluable in any disinfection protocol.

HydroSan disinfection sprayer

The HydroSan disinfection sprayer is a low volume industrial spray that combines water and disinfectant for accurate spray cleaning with 12 precision dosing tips. The system uses standard mains pressure and requires no power for use, making it ultra flexible around the farm. The sprayer can be wall mounted or fixed to a farm vehicle or trolley to make it fully mobile.

Features

The Venturi injection system uses standard mains pressure (2,5-10 Bar) to draw and blend chemical concentrate into the water stream.

No power required

12 dosing tips

Wall mounted

Comes with a 25m hose

A range of accessories are available

Placement

The HydroSan disinfection sprayer is flexible and easy to fit in any number of places, so it's easy to incorporate it into the farm routine:

Mounted on a trolley

Using automatic and manual hose reels

On tractors/farm vehicles

At strategic gate posts

In the poultry shed

Areas to disinfect

1

Vehicles

Disinfect the wheels and tyres when a vehicle enters the site.

2

Surfaces

Disinfect out door concrete plinth and packing room/control room floors.

3

Equipment

Disinfect equipment such as pallet trucks when collecting eggs before entering the sheds.

4

Tools

Disinfect hand tools as they enter the shed or packing/control room.

5

Moffett wheels

Disinfect wheels of moffet when catching and thinning

6

Egg transport systems

Disinfect the egg trays and pallets in the packing room.

7

Step-over barriers

Disinfect the step-over barrier at shed entrance.

8

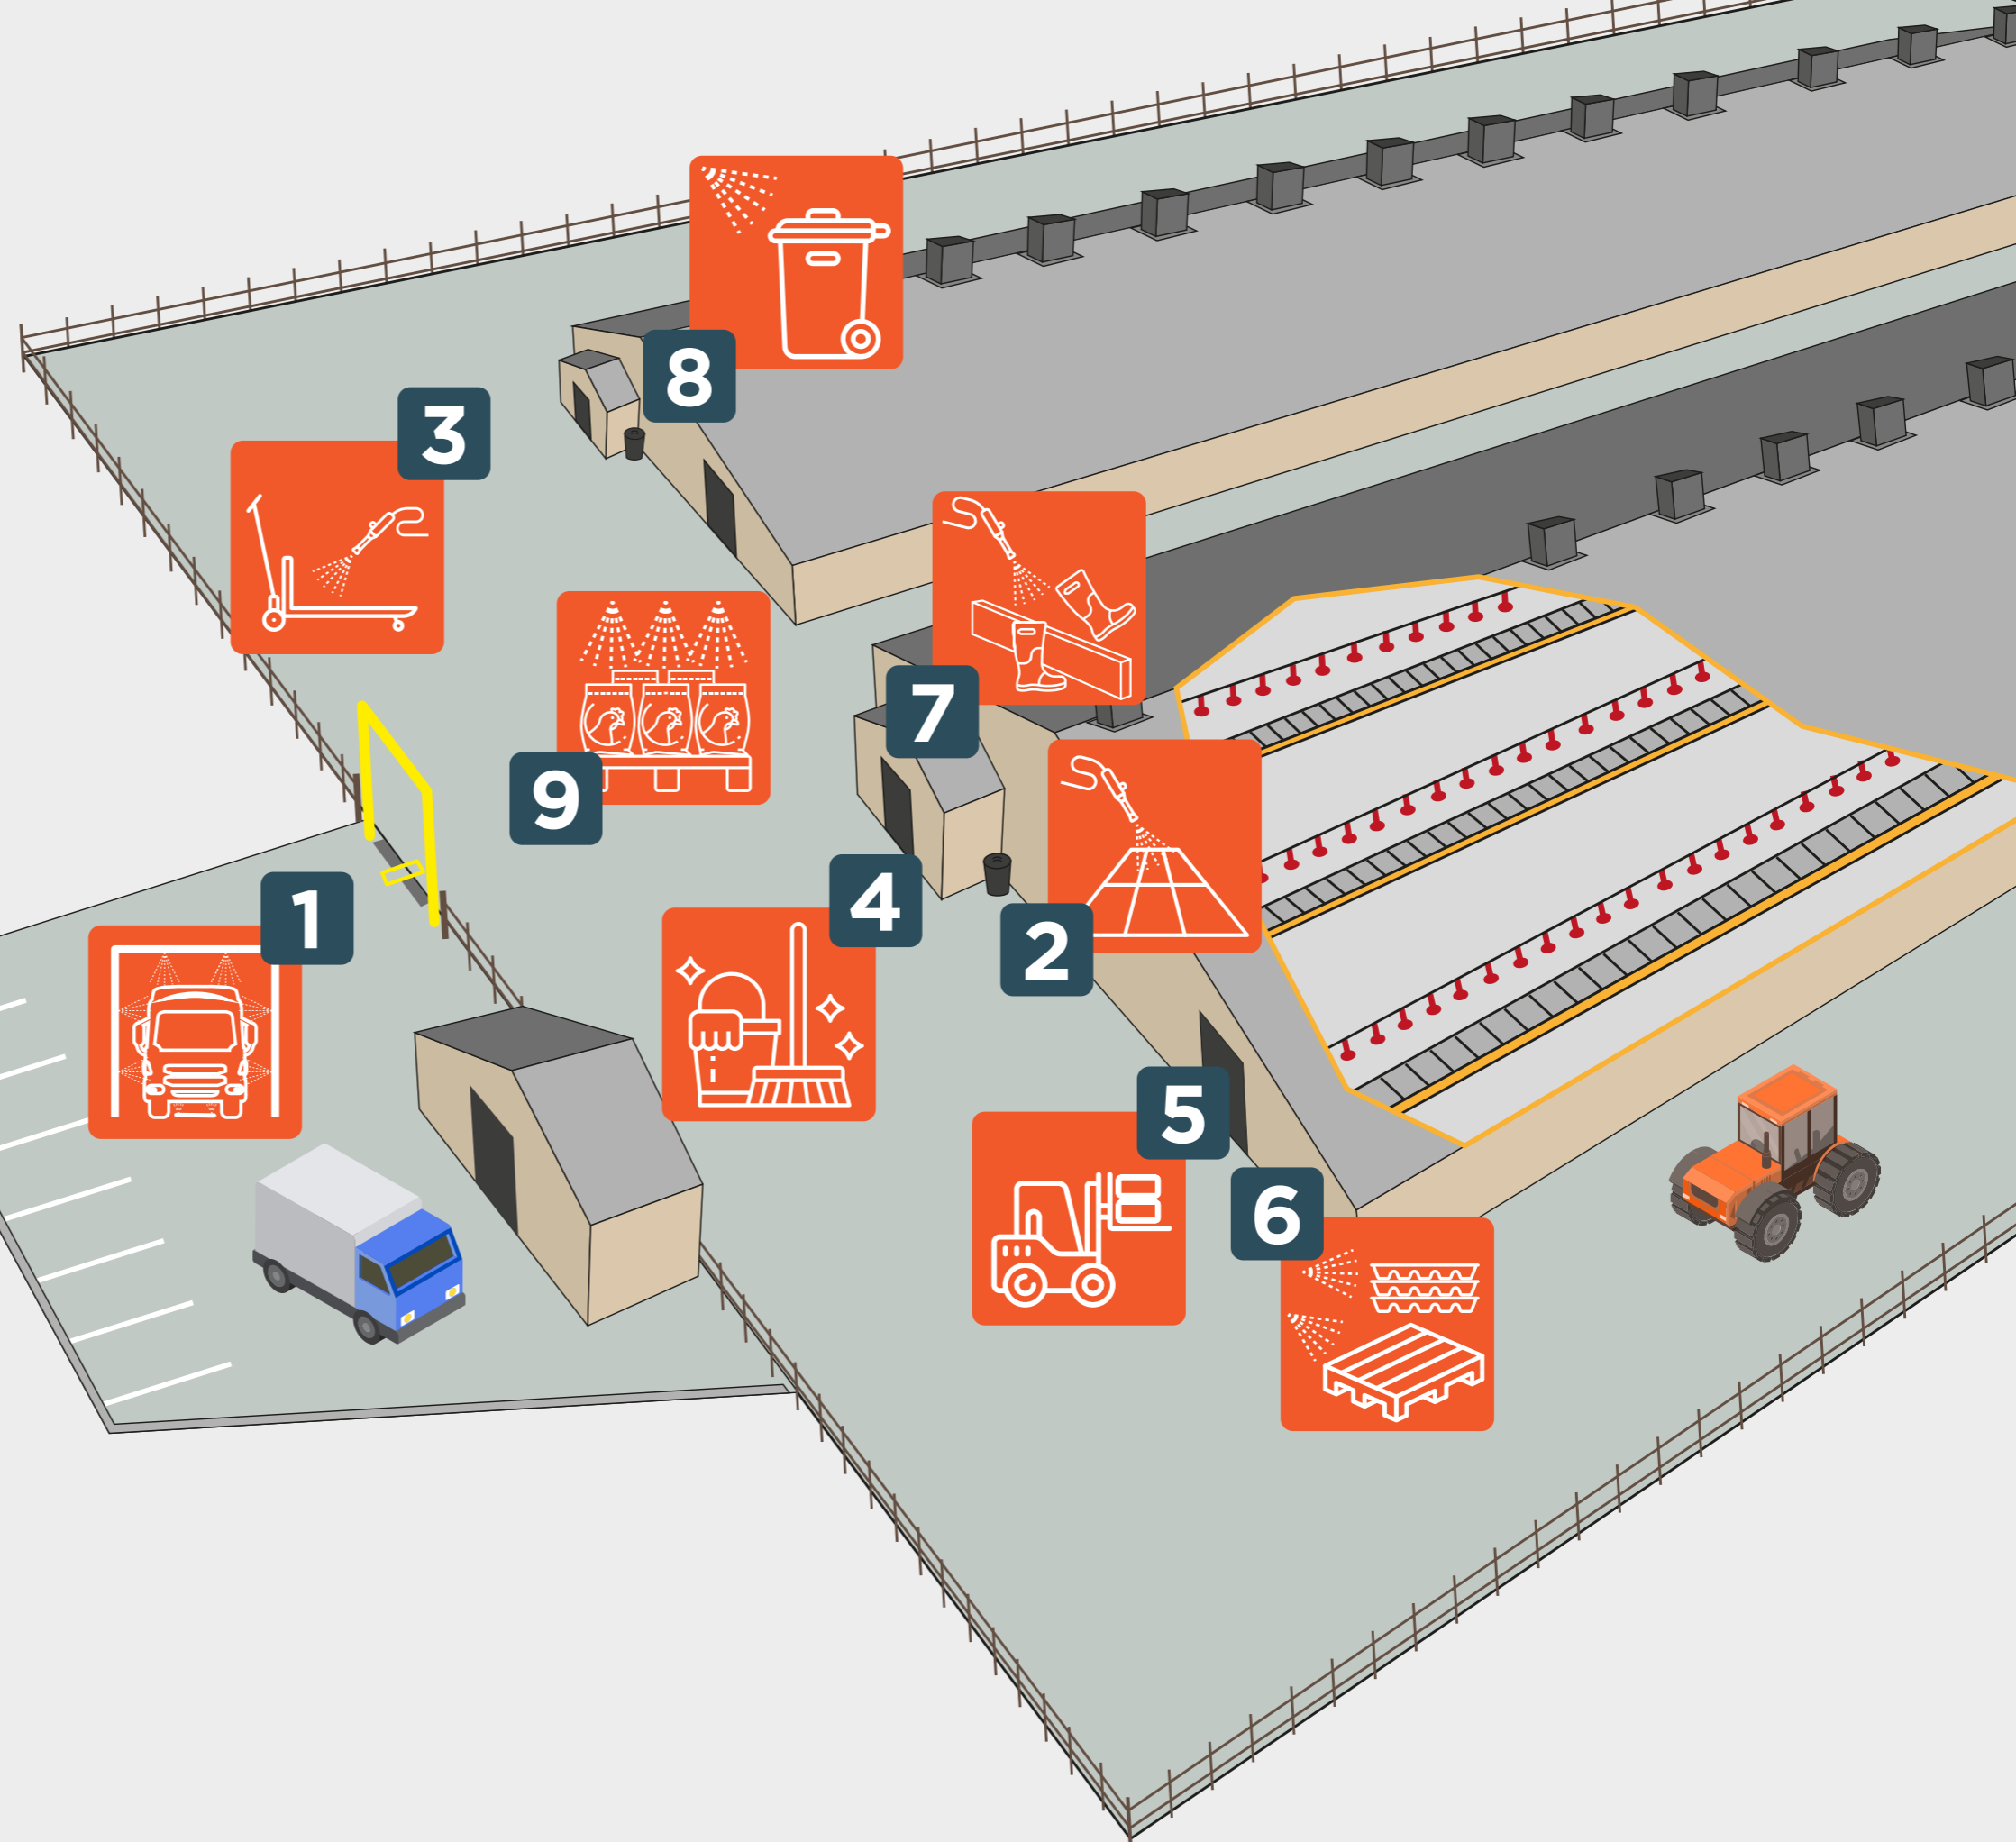

Dead bird bins

Disinfect dead bird bins.

9

Product packaging

Disinfect the plastic wrapping on bales before entering the shed.

The benefits of a Sanigene HydroSan disinfection sprayer

The HydroSan disinfection sprayer is easy to use and move around. Having several located at strategic points around the farm makes quick work of multiple disinfection tasks:

+ Makes light work of biosecurity practices

+ No power required, just a water connection

+ Quick and easy disinfection using standard mains pressure

+ Efficient use of water

+ Apply blended water and disinfectant at the same time

+ Place strategically around the farm for convenient disinfection stations

+ Can be fixed or mobile for ultimate flexibility

+ Disinfect anywhere on your site

+ Keep one on the tractor so it's never far from hand

Optimise biosecurity on farm

Now is an ideal time to review farm protocols, identify any weak spots, and make appropriate adjustments to your biosecurity measures. Chat to us about implementing flexible, easy, and efficient biosecurity measures at your facilities.
